TSHIKOTA FULUFHEDZEANI

Information Technology Graduate | Data Processing & Databases

Vuwani, Limpopo, South Africa | 073 623 5027 / 079 420 7066 | Fulufhedzeani@gmail.com | Code 10 Driver's Licence

PROFESSIONAL PROFILE

Information Technology graduate (Diploma, Vaal University of Technology) with a strong foundation in databases, systems analysis and programming. Hands-on project experience in data cleaning, preprocessing and structured dataset analysis using SQL, Python, Pandas and NumPy. Currently on the Umuzi Experience Accelerator Programme, building workplace readiness. Detail-oriented and a structured problem-solver, seeking an entry-level role in data processing, data quality, database support or information management.

TECHNICAL SKILLS

- **Databases:** SQL, MySQL
- **Data processing and analysis:** Data cleaning, preprocessing, feature engineering, data analysis and interpretation
- **Programming and tools:** Python, Pandas, NumPy, Matplotlib, Git, GitHub, Visual Studio Code
- **Machine learning (working knowledge):** Scikit-learn, TensorFlow, Keras, classification models, model evaluation
- **Microsoft Office:** Excel (basic), Word, PowerPoint
- **Information systems:** Systems analysis and design, project management

TECHNICAL PROJECTS

Depression Prediction Using Machine Learning

Python, Pandas, NumPy, Scikit-learn

- Cleaned, preprocessed and engineered features from a structured dataset to prepare it for model training and testing.
- Built classification models using Logistic Regression, Random Forest and Neural Networks.
- Evaluated models using accuracy, precision, recall and F1-score to compare performance and identify patterns in the data.

Medical AI Chatbot

Python, TensorFlow, Scikit-learn, Tkinter

- Developed a prototype chatbot that helps users with symptom-related queries.
- Preprocessed structured data and trained a machine-learning model for disease prediction.
- Built a graphical user interface with Tkinter.

EDUCATION

Diploma in Information Technology | Vaal University of Technology (VUT) | *[Year completed]*
Relevant modules: Database Systems, Systems Analysis and Design, Information Systems, Programming, Data Structures, Project Management

TRAINING AND PROFESSIONAL DEVELOPMENT

Umuzi – Experience Accelerator Programme | 6 months | *In progress*

- Work-integrated learning programme developing technical skills, communication, collaboration and workplace readiness.

Umuzi – Technical Business Support | 2 weeks

- Training in structured problem-solving and workplace-oriented digital skills for technical support environments.

Umuzi – Design Thinking Challenge | 2 weeks

- Worked on improving access to healthcare services: conducted user research (interviews, observations, online research), helped develop user personas, and tested the proposed solution using user feedback.

KEY STRENGTHS

Attention to detail and data accuracy | Analytical thinking | Structured problem-solving | Technical troubleshooting | Communication and collaboration | Quick to learn new systems and business processes

PERSONAL DETAILS

Nationality: South African | **Languages:** English, Tswana, Tsonga, Zulu, Pedi
